* The study used an unduplicated count of students enrolled between 7/1/18 and 6/30/19, which included students enrolled in the Summer II 2018, Fall 2018, Spring 2019, and Summer I 2019 semesters. The methods is more meaningful for studying economic impact, but it differs from IUPUI’s standard enrollment reporting, which uses beginning-of-term numbers on a semester-by-semester basis. Both perspectives accurately draw from the same underlying data.
